PROJECT REVIEW SESSION

Reviewing status of OWASP projects

OWASP

The Open Web Application Security Project

Actual Situation

OWASP
The Open Web Application Security Project

- Project Inventory …where are we right now?
- More than 100 projects
- Many are incubators
- No clear status -progress on them
- Way to many and complex for one person to review

OWASP
The Open Web Application Security Project

Technical Project Advisors!

http://owasp.blogspot.com/2013/09/meet-our-new-technical-project-advisors.html

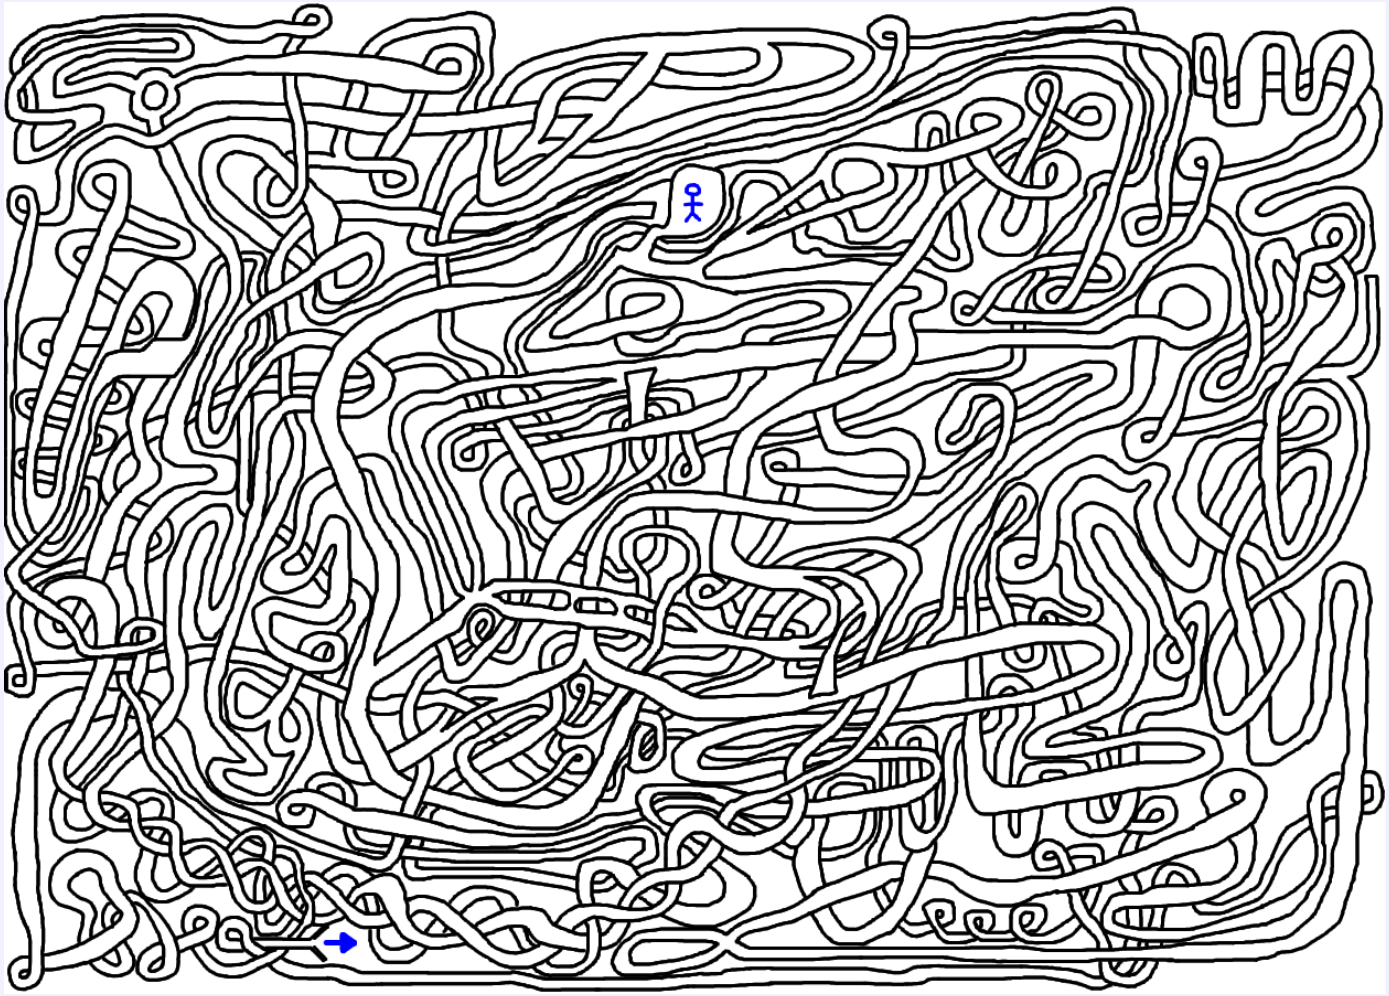
Project Technical Advisors

OWASP
The Open Web Application Security Project

- Advisors are just advisors, not dictators
- Help review projects based on experience and knowledge
- Helped create the criteria
- Provide results to the Project leaders for feed back
- Provide results to the community

OWASP
The Open Web Application Security Project

Where do we start?



OWASP
The Open Web Application Security Project

Goals:

- To measure the health and quality of projects
- Provide feedback to project leaders how to improve their projects
- Confirm if they comply with OWASP project guidelines
- Clean up inventory status in case project has become inactive or downgrade

OWASP
The Open Web Application Security Project

Result's review

- Grace period for project leaders to adapt and comply with guidelines and behavior
- After grace period, project will be categorized based on results
- Results will be published to the community for feedback

How to review

OWASP
The Open Web Application Security Project

- Read the guidelines https://www.owasp.org/index.php/Guidelines_for_OWASP_Projects
- Project list: https://www.owasp.org/index.php/Category:OWASP_Project
- Read the criteria
- Gather in group of 2 max
- Select a project from any category
- Some criteria need the assistance of developers of programmers
- Ask questions to project leaders for clarification
- Don’t cheat!
