OWASP Italy Day
"Web Security in a Mobile World"
Rome - 23rd November 2012

Grazie alla collaborazione con i Master in Sicurezza Informatica del Dipartimento di Informatica - Università "La Sapienza", il 23 Novembre si terrà a Roma l'OWASP Day 2012.

Master in Gestione della Sicurezza
Master in Sicurezza dei Sistemi e delle Reti
Master in Governance e Audit dei Sistemi Informativi

Agenda

9:00	**Registration**
9:30	**"Welcome and opening of the works"** Prof. L.Mancini - Director of the Master in Information Security, Università "La Sapienza" Rome.
9:45	**"Introduction to the OWASP Day 2012"** Matteo Meucci - OWASP-Italy Chair
10:00	**"My web site has been breached and my customer's data have been published online, what I can do next?"** Marco Morana - CISO Citigroup
10:30	**"Attackers, lies and you"** Vincenzo Iozzo - Director of vulnerability intelligence at Trail Of Bits Inc
11:00	**"SPARQL Injection - attacking the triple store"** Simone Onofri — Consultant, Techub SpA, Luca Napolitano — Freelance
11:30	**"Android and mobile security: client side, server side, privacy (do android malware writers dream of electric sheep?)** Igor Falcomatà — CTO, Enforcer srl
12:00	**"La convergenza tra OWASP ed (ISC)2: connubio tra approccio empirico e sistematico"** Paolo Ottolino, Claudio Sasso — Board (ISC)2 Italy Chapter
12:15	**ISACA Roma: "Strumenti per la Governance IT"** Prof. C. Cilli - Presidente ISACA Roma
12:30	**CSA Italy: "Portabilità, interoperabilità e sicurezza applicativa nel cloud"** Matteo Cavallini - CSA Italy chapter, Vice President
12:45	**IsecLab: "Cutting-edge research in system security"** Marco Balduzzi, Ph.D., Sr. Security Researcher
13:15	**Secure Banking Expert Community: "Unire forze e competenze tecniche per arginare il crimine (sempre più) organizzato"** Claudio Santacesaria

In collaborazione con

Key Speakers

Marco Morana — Responsible for security risk and architecture governance of global application programs in Citigroup Institutional Clients Group (ICG) EMEA
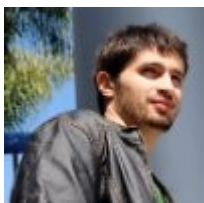

"My web site has been breached and my customer's data have been published online, what I can do next?". In this talk, Marco Morana, will show an example of data breach and the business impact on a Company. Marco will discuss the importance of adopting the OWASP Guide for CISO that could be useful to mitigate the next impacts by adopting a strategic approach to application security. This approach is focused on risk management, IS governance and software security assurance.

Marco Morana with more than 16 years of professional experience in application security (6 years of it in the financial sector) in diverse professional roles such as technology officer, program manager, business partner and company founder, team leader, security architect, security consultant, software contractor and engineer.

Vincenzo Iozzo — Director of vulnerability intelligence at Trail Of Bits Inc

This talk will analyze recent trends in the mobile threats landscape, suggest effective strategies to mitigate these issues and try to gauge what the future looks like for companies and organizations seeking to protect themselves. Specifically the talk will highlight how mobile poses a totally different set of problems that have very little similarities with desktops and why the security community at large has to make a mindset shift to handle them. Finally assisted by data collected in the past few years we will discuss future trends and threats.

Vincenzo Iozzo leads the collection and analysis of vulnerability intelligence at Trail of Bits. Vincenzo serves as a committee member on the Black Hat Review Board and is a co-author of the "iOS Hacker's Handbook" (Wiley, 2012). He is perhaps best known for his participation in Pwn2Own, where he co-wrote the exploits for BlackBerryOS and iOS that won the contest in 2010 and 2011 and where he co-wrote exploits for Firefox, Internet Explorer, and Safari that placed second in 2012.

Perchè partecipare?

L'OWASP Day rappresenta un punto di riferimento inportante per rimanere aggiornati sulle tematiche di Sicurezza del Software.

Speaker d'eccezione tratteranno le nuove tematiche di Web Application Security per una delle più rinomate e attese conferenze di Information Security sul territorio nazionale.

In questa occasione CIO, CTO, CISO, Auditor, Responsabili IT, Security Manager e responsabili della Security Governance avranno l'occasione di aggiornarsi sull'evoluzione della sicurezza applicativa e sulle nuove iniziative di Software Security presenti nel panorama internazionale.

Non sentirete parlare di prodotti, di aziende ma di approdondimenti tecnici e manageriali legati al mondo della Application Security.

Gli speaker sono stati valutati dall'OWASP Italy Board, garantendo un alto livello dei talk.

Partecipare all'OWASP Day è un modo per conoscere le iniziative di OWASP, avere un'anteprima delle principali novità in tema di sicurezza del software, incontrare i maggiori esperti in questo settore.
