SHOW OF HANDS

#appseclatom

CORE MISSION

The Open Web Application Security Project (OWASP) is a 501c3 not-for-profit also registered in Europe as a worldwide charitable organization focused on **improving the security of software.**

Our mission is to **make application security visible**, so that people and organizations can **make informed decisions** about true application security risks.

Everyone is welcomed to participate in OWASP and all of our materials are available **under free and open software licenses.**

Core Values

OPEN Everything at OWASP is radically transparent from our finances to our code.

- **INNOVATION** OWASP encourages and supports innovation/experiments for solutions to software security challenges.
 - **GLOBAL** Anyone around the world is encouraged to participate in the OWASP community.
 - **INTEGRITY** OWASP is an honest and truthful, vendor agnostic, global community.
- 

Approach = “Open”

- Open means rough consensus and running code
- Open means free to use and modify
- Open means independent
- Open means open information sharing
- Open means wider audience and participation
- Open means everyone is a peer in this global community

Application Security Is Just Getting Started

- You can't improve what you can't measure
 - **We need to...**
 - Experiment
 - Share what works and what does not
 - Collaborate our efforts
 - Expect another 10 years!
- 

OWASP by the numbers...

- **OWASP Tools and Documentation**
 - 15,000+ downloads (per month)
 - 30,000+ unique visitors (per month)
 - 2 million+ website hits (per month)
 - Citations (Industry, Government, Standards Bodies)
 - Platform for advancement
- **OWASP Chapters are blossoming worldwide**
 - Active community, members, chapters worldwide
 - 20,000+ participants

~ 140 Projects

- **PROTECT** - These are tools and documents that can be used to guard against security-related design and implementation flaws.
 - **DETECT** - These are tools and documents that can be used to find security-related design and implementation flaws.
 - **LIFE CYCLE** - These are tools and documents that can be used to add security-related activities into the Software Development Life Cycle (SDLC).

Evt. letterwoord :

3° Rechtsvorm : Vereniging zonder winstoogmerk
Andere :

“I saw the ‘blossoming’ of OWASP in Portugal’s Spring. From an external viewpoint, OWASP has moved from niche to widely relevant, from localized to global, from pen testing to SDLC, from server to every component of the application’s delivery and use, from InfoSec to business process relevance.” – Colin Watson

**OWASP
SUMMIT
2011**
LISBON
PORTUGAL
FEB 8-11

OWASP Summit

- 180 application security experts from over 120 companies, 30 different countries, and 44 local OWASP chapters.
- The Summit was NOT a conference – there were no talks, static presentations, or training seminars. Instead working sessions were used to author documents, create software, draft standards, and forge relationships.
- Many of the working sessions were on a fixed schedule determined before the start of the summit. However, just as many were created “dynamically” by the attendees.
